

Lone Star Retractor System™ APS Retractor™ Ring

We are pleased to announce the addition of VELCRO® backing to our Lone Star APS Retractor.

In response to customer suggestions, starting next month, you will begin receiving our enhanced single-use sterile APS Retractor with VELCRO backing. In addition to the outstanding exposure and surgical site management you have come to expect with the Lone Star Retractors, you will now enjoy the following benefits:

- Readily attaches to most surgical drapes*
- Facilitates setup of the surgical site
- Increases surgical site stability
- Easier to reposition than when using towel clamps

If you have any questions regarding this change, please contact your local CooperSurgical sales representative, or Victoria Ziko, Product Manager at 800-645-3760

** If the VELCRO does not stick to the drapes you currently use, you can continue using towel clamps to secure to the drape.*
