NON-SURGICAL FEMININE REJUVENATION WORKSHOP

Alinsod Institute for Aesthetic Vulvovaginal Surgery
WHAT IS REO?

REO (Radiofrequency Enhanced O-Shot) is the combination of revolutionary ThermiVa radiofrequency treatment with the O-Shot. It is also referred to as “Thermi-O.” Dr. Alinsod, developer and inventor of ThermiVa, has worked with Dr. Charles Runels, inventor of the O-Shot/Vampire-Lift/Priapus Shot, to develop an intense day of advanced training for physicians, nurses, and PAs, only available at the Alinsod Institute for Aesthetic Vulvovaginal Surgery in Laguna Beach, California. This module has been integrated into Dr. Alinsod’s decade old training programs. The Alinsod Institute is proud to be the only center in the world to teach Aesthetic Vulvovaginal Surgery, ThermiVa, and now the O-Shot, Vampire Lift, and Dermoelectroporation.

ThermiVa has been FDA cleared for dermatologic conditions and surgical nerve ablation. Dermatologic conditions include loose and saggy skin, dry skin, and insensitive skin. In Europe, ThermiVa is approved for treatment of vulvo-vaginal laxity. The O-Shot has been used for orgasmic dysfunction, stress incontinence, overactive bladder, and lichen sclerosis. The combination of the two revolutionary treatments hold great promise for advanced non-surgical approaches to aid in female dermatologic conditions.
